PROFILE

Software developer with experience building backend and full-stack applications using TypeScript, Node.js, PHP, and React. I enjoy designing systems end-to-end, from architecture and planning to deployment. Outside of work, I regularly build and ship personal projects in production with real users. I gravitate toward startup-style teams that value ownership, growth, and initiative.

TECHNOLOGIES

TypeScript, PHP, Python | Node.js (Nest.js, Express), PHP (Slim) | React, Next.js | AWS, Docker, Jenkins, Azure DevOps | PostgreSQL, SQL | Git, Postman, Playwright, Jira

PROFESSIONAL EXPERIENCE

Software Developer | AutoVerify

REMOTE, JAN 2025 - PRESENT

- Owned development of a project end-to-end from planning and design through implementation and deployment to production.
- Build and maintain backend services using PHP (Slim) and Node.js (Nest.js).
- Work with AWS for deployment and infrastructure.
- Set up and support CI/CD pipelines with Jenkins and Azure DevOps.
- Contribute to new product features, bug fixes, and performance improvements with the dev team.

Frontend Developer Intern | Naos

REMOTE, NOV 2024 - JAN 2025

- Added and refined frontend features with Next.js and JavaScript.
- Wrote automated Playwright tests to reduce bugs and improve stability.
- Worked with other developers to plan and build new features.

PROJECTS

Morning Riot Roasters – E-commerce Platform (Production)

Next.js | React | Stripe - www.morningriot.ca

- Designed and built a **production e-commerce website** for a small-batch coffee brand.
- Implemented product catalog, checkout flow, and payment processing.
Deployed and operating in production, **actively processing customer orders**.

EDUCATION

BrainStation | Diploma, Software Engineering

TORONTO, ON | JUNE 2024 - SEPT 2024

Western University | Bachelor's in Mechanical Engineering

LONDON, ON | JAN 2017 - APR 2021
